

A Convenience Packed Medical Food & Drug

Gabavale-5™

▶ GABAdone™ 60 Capsules

▶ Diazepam 5 mg 30 Tablets

No Refills Without
Physician Authorization

Rx Only

NDC# 68405-8054-26
of this co-pack

Gabavale-5™ Convenience Pack

Diazepam - Why is this medication prescribed?

Diazepam is an anti-anxiety medication in the benzodiazepine family. Diazepam and other benzodiazepines act by enhancing the effects of gamma-aminobutyric acid (GABA) in the brain. GABA is a neurotransmitter that inhibits activity in the brain. It is believed that excessive activity in the brain may lead to anxiety or other psychiatric disorders. Diazepam is also used to treat acute alcohol withdrawal and seizures as well as to relieve muscle spasms and to provide sedation before medical procedures. Diazepam acts on the central nervous system to produce a calming effect.

GABAdone™ - Why is this medication prescribed?

GABAdone is a Medical Food product that provides the amino acids that are precursors to the neurotransmitters that are associated with the induction and maintenance of sleep. This Medical Food stimulates the body to produce the neurotransmitters that induce sleep, promote restorative sleep, and reduce snoring. Patients with sleep disorders frequently have increased nutritional requirements for tryptophan and choline. Patients with sleep disorders frequently show reduced blood levels of serotonin and 5-hydroxytryptophan. Choline deficiency has also been associated with sleep disorders, particularly those associated with sleep apnea syndromes.

GABAdone aids in the nutritional management of serotonin, acetylcholine, and GABA requirements in patients with sleep disorders and sleep disorders associated with anxiety.
