Rx Only  
NDC# 68405-8024-26  
of this co-pack

## Gabazolamine™ Convenience Pack

### **Alprazolam: Why is this medication prescribed?**

Alprazolam is used to treat anxiety and panic disorders. It belongs to a class of medications called benzodiazepines which act on the brain and nerves (central nervous system) to produce a calming effect. It works by enhancing the effects of a certain natural chemical in the body (GABA). Alprazolam is used to treat anxiety, panic disorder, repeated episodes of anxiety, anxiousness associated with depression. This medication is also used for abnormal trouble sleeping and involuntary quivering.

### **GABAdone™ : Why is this medication prescribed?**

**GABAdone** is a Medical Food product that provides the amino acids that are precursors to the neurotransmitters that have been depleted due to certain disease states or as a result of certain drug side effects. This Medical Food stimulates the body to produce the neurotransmitters that induce sleep, promote restorative sleep, and reduce snoring. Patients with sleep disorders frequently experience a nutritional deficiency of tryptophan and choline. Patients with sleep disorders frequently show reduced blood levels of serotonin and 5-hydroxytryptophan. Choline deficiency has also been associated with sleep disorders, particularly those associated with sleep apnea syndromes.

**GABAdone** aids in the nutritional management of serotonin, acetylcholine and GABA production deficiencies in patients with sleep disorders and anxiety.
