Sentrazolam AM-0.25TM

Convenience Pack

Alprazolam - Why is this medication prescribed?

Alprazolam is used to treat anxiety and panic disorders. It belongs to a class of medications known as benzodiazepines that act on the central nervous system to produce a calming effect. It works by enhancing the effects of a certain natural chemical in the body (GABA). Alprazolam is used to treat anxiety, panic disorder, repeated episodes of anxiety, anxiousness associated with depression. This medication is also used for abnormal trouble sleeping and involuntary quivering.

Sentra AMTM - Why is this medication prescribed?

Sentra AM is a Medical Food formulated to meet the nutritional requirements of patients with fatigue syndromes and impaired cognition. **Sentra AM** increases and maintains the production of acetylcholine by brain cells and peripheral neurons. **Sentra AM** contains choline and acetylcarnitine as precursors to acetylcholine production. It is well recognized that defects of acetylcholine function are part of a number of disease states including Alzheimer's disease, vascular dementia, chronic fatigue, and memory disorders. Patients with cognitive impairment and fatigue syndromes are known to have increased requirements for choline.

Sentra AM aids in the nutritional management of the acetylcholine requirements of patients with cognitive impairment and fatigue syndromes.
