Physician Authorization

**Rx Only**  
NDC# 68405-8053-26  
of this co-pack

## **Sentravil PM-25™** **Convenience Pack**

### **Amitriptyline - Why is this medication prescribed?**

This medication is one of several tricyclic antidepressants, so-called because of the three-ring chemical structure common to these drugs. Amitriptyline acts to block reabsorption of neurotransmitters. Amitriptyline and the other tricyclic antidepressants are primarily used to treat mental depression. Amitriptyline is also sometimes prescribed to help treat pain associated with cancer. In addition, it is sometimes prescribed for various types of chronic pain.

### **Sentra PM™ - Why is this medication prescribed?**

**Sentra PM** is a Medical Food product that provides the amino acids that are precursors to the neurotransmitters that have been depleted due to certain disease states or as a result of certain drug side effects. This Medical Food stimulates the body to produce the neurotransmitters that induce sleep, promote restorative sleep, and reduce snoring. Patients with sleep disorders frequently experience a nutritional deficiency of tryptophan and choline. Patients with sleep disorders frequently show reduced blood levels of serotonin and 5-hydroxytryptophan. Choline deficiency has also been associated with sleep disorders, particularly those associated with sleep apnea syndromes.

**Sentra PM** aids in the nutritional management of serotonin and acetylcholine production deficiencies in patients with sleep disorders and depression.
