

## Therafeldamine™

### Convenience Pack

#### **Piroxicam: Why is this medication prescribed?**

Piroxicam is used to reduce pain, swelling, and joint stiffness from arthritis. This medication is known as a nonsteroidal anti-inflammatory drug (NSAID). This medication has also been used to treat other conditions including gouty arthritis, arthritis of the spine, and muscle injuries. Do not lie down for at least 30 minutes after taking this drug.

#### **Theramine™ : Why is this medication prescribed?**

**Theramine** is a Medical Food product designed to aid in the nutritional management of pain syndromes. **Theramine** stimulates production of serotonin, GABA, norepinephrine, nitric oxide and acetylcholine, the neurotransmitters that are involved in pain disorders. If the timing and secretion of these neurotransmitters are effectively modulated, acute, and chronic pain disorders are more effectively managed. **Theramine** provides L-arginine at a low dose along with choline and L-glutamine to inhibit the NMDA and opioid receptors.

**Theramine** aids in the nutritional management of serotonin, GABA, and acetylcholine production deficiencies in patients with pain syndromes.
