Theraprogen-800™

- ▶ **Theramine™ 90 Capsules**
- ▶ **Ibuprofen 800 mg 30 Tablets**

No Refills Without
Physician Authorization

Rx Only
NDC# 68405-8188-36
of this co-pack

Theraprogen-800™ Convenience Pack

Ibuprofen - Why is this medication prescribed?

Ibuprofen is a nonsteroidal anti-inflammatory drug (NSAID), which relieves pain and swelling (inflammation). It is used to treat headaches, muscle aches, backaches, dental pain, menstrual cramps, arthritis, or athletic injuries. This medication is also used to reduce fever and to relieve minor aches and pain due to the common cold or flu. This drug works by blocking the enzyme in the body that produces prostaglandins. Decreasing prostaglandins aids in reducing pain, swelling, and fever.

Theramine™ - Why is this medication prescribed?

Theramine is a Medical Food product designed to aid in the nutritional management of pain syndromes. **Theramine** stimulates production of serotonin, GABA, norepinephrine, nitric oxide and acetylcholine, the neurotransmitters that are involved in pain and inflammation. If the timing and secretion of these neurotransmitters are effectively modulated, acute, and chronic pain disorders are more effectively managed. **Theramine** provides L-arginine at low dose along with choline and L-glutamine used to inhibit the NMDA and opioid receptors.

Theramine aids in the nutritional management of serotonin, GABA, and acetylcholine requirements in patients with pain syndromes
